

Artist canvas

Preprimed artist canvas for framing

PRODUCT SPECIFICATIONS

Double-Primed Artist Canvas is coated with an acrylic base formulation to ensure maximum protection against any traces of harmful impurities that may develop over the years as a result of ageing.

To achieve this, a neutralizing agent is included to absorb any traces of acidic compounds.

The whiteness of the canvas is enhanced by the use of Titanium Dioxide pigment of the highest purity.

The material analysis of this pigment serves as a guarantee that it is free of any byproducts that could affect the long-term durability of the cotton base.

Fabric	Weave	Composition	Finish	Width	Weight
DR6	Derhustie	100% Cotton	Double Primed	186cm	300g/sqm
